Response to Amendment

1. The amendment filed 11/5/2002 has been entered.
2. The provisional double patenting rejection of claim 1 under 35 U.S.C. §101 is withdrawn.
3. The provisional obviousness-type double patenting rejection of claim 1 over claims 11-14 of copending Application No. 09/783,896 is maintained since the terminal disclaimer was not filed.
4. The objection to the specification is withdrawn.
5. The references lined through in section 8 of the Office action mailed 7/05/2002 are still not considered because the references were not provided in the application. In addition, the reference AB is required to have publication date.
6. The rejection of claim 1 under 35 U.S.C. §102(b) anticipated by Suzuki et al. (Jpn. J. Cancer Res., 1995, Vol. 86, pg. 885-889) is withdrawn.

NEW GROUNDS OF REJECTIONS

Claim Rejections - 35 USC § 112

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1637

8. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a. Claim 1 is vague and indefinite because of the phrase "which binds to RNA directly" which has no antecedent basis. It is unclear whether the amplified oligonucleotide is RNA or not. Clarification is required.

Claim Rejections - 35 USC § 102

9. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

10. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Sano et al. (5,665,539).

Sano et al. disclose an immuno-PCR to detect immobilized BSA involving using the chimera-pUC19 conjugate. The chimera-pUC19 conjugate binds to the antibody which binds to the BSA. The pUC19 DNA is amplified by PCR (See column 10, lines 39 to column 11, lines 14, example 1). The products are detected by fluorescent dyes staining such as ethidium bromide and ethidium homodimer (See column 7, lines 26-32). The marker molecules are typically DNA,

Art Unit: 1637

RNA, DNA-RNA hybrids, and the attached marker allows the amplification of its fragments by PCR with appropriate primers (See column 4, lines 3-7).

Since the language does not specify whether the amplified oligonucleotide is DNA or RNA, the language can be interpreted^{ed} that the amplified oligonucleotide can be DNA or RNA, the teachings of Sano et al. anticipate the limitations of claim 1.

11. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
